

Key Points for Discussion with Messrs.

Brundage and Mansure

1. Assuming that it is the desire of the Administration to have CIA and GSA work out some solution which would insure GSA participation,
 - a. does GSA refuse to participate if we sign the contract?
 - b. If GSA signed contract, would they agree that we had final authority in case of disagreement? Would they enter into a full partnership with complete coordination on all aspects?
 - c. Assuming that Mansure has not reneged on his previous agreement to Harrison & Abramovitz, do we need an associate architect? (From Harrison & Abramovitz's viewpoint, they say "No" but are willing to accept one if we want it.) If we have an associate, shouldn't he be local? Also, we should reiterate our position that the associate, as well as the manner and the degree in which he will be associated is acceptable to Harrison & Abramovitz.
 - d. Harrison & Abramovitz would prefer to supervise construction. This is contrary to GSA normal procedures. Would GSA agree to this?
